

Curriculum Vitae

Personal Data

Name	Kam To Billy Sievers (formerly KTB Chan)
Address	Hamilton, Ontario, Canada
Telephone Number	+1 (403) 478-4665
Email Address	chank117@mcmaster.ca or ktbsievers@gmail.com

Education

current	Doctor of Philosophy, Dept. of Physics and Astronomy , McMaster University, GPA: - -
2023	Master of Science in Physics , Memorial University of Newfoundland, GPA: 4.0/4.0
2020	Bachelor of Science (First Class Honours) in Physics. , University of Calgary, GPA: 3.6/4.0

Research Experience

2023 – current	Graduate Research Assistant , Theoretical Physics Group, McMaster University Supervisor: Dr. Hari Kunduri, McMaster University
2020 – 2023	Graduate Research Assistant , Gravity Group, Memorial University Supervisor: Dr. Ivan Booth, Memorial University Associates and Mentors: Dr. Robie A. Hennigar, Dr. Hari Kunduri Project Information: The investigation of self-intersecting marginally outer-trapped surfaces continues with projects that test the phenomenon with regards to black holes with different parameters, such as charge or rotation. Roles: My roles involved finding numerical solutions to problems posed by the project, contributing to the authorship of publications [1] and [2], the mentorship of undergraduate students in the research group, and dissemination of the group's results through conference and invited seminar presentations.
2019 – 2020	Undergraduate Honours student , University of Calgary Supervisor: Dr. Sean Stotyn, University of Calgary

Publications

-
- [1] R. A. Hennigar, K. T. B. Chan, L. Newhook, and I. Booth, “The Interior MOTSs of Spherically Symmetric Black Holes,” (2021), arXiv:2111.09373 [gr-qc]. Published in Physical Review D. Secondary author.
 - [2] I. Booth, K. T. B. Chan, R. A. Hennigar, H. Kunduri, and S. Muth, “Exotic marginally outer trapped surfaces in rotating spacetimes of any dimension,” (2022), arXiv:2210.15685 [gr-qc]. Preprint, accepted for publication in Classical and Quantum Gravity. Joint author.

Research Interests

Quantum gravity, black holes, black hole thermodynamics, AdS/CFT correspondence, black hole mergers (numerical simulations and analytical approximations), numerical spectral analysis, finite difference techniques, Monte-Carlo techniques.

Theses

2023	Masters Thesis Title: Self-Intersecting Marginally Outer-Trapped Surfaces in Black Holes Supervisor: Ivan Booth, Memorial University of Newfoundland Synopsis: Self-intersecting marginally outer-trapped surfaces (MOTSs) play a key role in binary black hole mergers [Pook-Kolb, Birnholtz, Krishnan, Schnetter]. With the same phenomenon appearing inside the Schwarzschild black hole [Booth, Hennigar, Mondal], extending the investigation to black holes with inner horizons yields exotic correlations between the intersecting-behaviour and the stability of the inner horizon. Parts of this work have been published.
2020	Undergraduate Honours Thesis Title: Near Horizon Geometries as Tangent Spacetimes and their Relation to Extremal Black Hole Entropy Supervisor: Sean Stotyn, University of Calgary Synopsis: Continuing from Stotyn's <i>A Tale of Two Horizons</i> (2015), the goal is to investigate the Ginsparg-Perry limiting procedure and show that near horizon geometries are tangent spacetimes whose global properties are a misrepresentation of the parent spacetime. This work is will be drafted together with extended works for publication.

Selected Coursework

University of Calgary: Advanced Classical Mechanics, Electrodynamics, Computational Physics I, II, &III
Memorial University: Quantum Information and Computing, Differential Manifolds & Riemannian Geometry, Advanced General Relativity, Group Theory.

Above listed graduate-level courses were credited towards B.Sc. and M.Sc. programs, respectively.

Scholarships & Academic Awards

2023 – 2027	Graduate & Research Scholarship , McMaster University, \$16 000 CAD per year.
2021 – 2022	Fellow of the School of Graduate Studies , Memorial University, Awarded to the top 10% of graduate students on academic merit.
2020 – 2022	SGS Baseline Funding , Memorial University, \$6 500 CAD per year.
2016, 2017, 2018, 2019	International Entrance Scholarship , University of Calgary, \$15 000 CAD per year.

Employment History

2023 – current	Graduate Teaching Assistant Employer: Dept. of Physics and Astronomy, McMaster University.
2020 – 2022	Graduate Teaching Assistant Employer: Dept. of Physics and Physical Oceanography, Memorial University. Courses: Introductory Physics I & II (lab staff member, Fall 2021 & Winter 2022), General Physics I (remote lab staff member, Winter 2021), Physics of Device Materials (remote marker, Fall 2020). Description: One of six staff members leading and marking weekly laboratory sessions for approximately 200 students across four sessions. Marked assignments and assembled assignment answer keys.
2017 – 2020; 2022 – 2023	Tutor, Instructor and Instructors' Team-Lead Employer: MathPro Learning Centre, 23-41 Chelsea St NW, Calgary AB. Description: Employed for one-on-one tutoring of high school mathematics and physics, developed and managed an extracurricular coding camp.
2020	Undergraduate Teaching Assistant Employer: Dept. of Physics and Astronomy, University of Calgary. Courses: Introductory Electromagnetism, and Thermal Physics (lab instructor, Winter 2020); Modern Physics (assignment and assessment marker, Winter 2020). Description: One of two laboratory instructors for an introductory physics lab section, answering questions and marking lab reports for a section of approximately 20 students. Also fulfilled marking duties for a major-stream modern physics course.

Students Mentored

Students were funded and entrusted to by Ivan Booth.

- **Liam Newhook** (B.Sc. Physics) – summer intern 2021 & 2022, honours thesis 2021-2022, manuscript publication [1], Memorial University of Newfoundland.
- **Zachary K. Hoyles** (B.Sc. Physics) – summer intern 2022, Memorial University of Newfoundland.

Computer Skills

Python: Computational Physics courses have covered the implementation of numerical methods and data handling in Jupyter notebooks. Notable topics include machine learning, finite difference methods, discrete Fourier analysis, and Monte-Carlo techniques. These skills were vital assets in the development of [1] and [2].

Others: Mathematica 12 (RGTensor), Maple 2021 (GRTensorIII), L^AT_EX, Java.

Affiliations, Leadership, and Community Service

Classical and Quantum Gravity (CQG) (2023),

Referee – served as a co-reviewer in the peer-review process

Canadian Association of Physicists (May 2021 – current), *Graduate-student member*

Rothney Astrophysical Observatory, University of Calgary (2016-2019, 2022-2023)

Volunteer – telescope operator during open-house nights.

Graduate Physics Society, Memorial University (2020-2022)

Member – involved in most society activities.

Dept. of Physics and Astronomy, University of Calgary (2016-2019)

Volunteer – involved yearly in the department's outreach event *Rollercoasterology*.

Club executive – VP Events (2017-2018) of the Physics & Astronomy Students' Association (PASA).

Conferences, Symposia, & Seminars

Year	Title: Self-intersecting surfaces in black holes
2023	Type: Conference talk (~15mins) at 8th Annual PHAS symposium , University of Calgary, Canada. at Theory Canada 15 , Mount Allison University, Canada. at Canadian Association of Physicists Congress 2023 , UNB, Canada.
2022	Title: Self-intersecting marginally outer trapped surfaces in black holes Type: Seminar (~1 hr) at Max Plank Institute for Gravitational Physics Seminar , AEI Hannover, Germany. at Relativity Seminar of the Institute of Theoretical Physics , recording available (link), Charles University, Czech Republic. at Institut de Ciències del Cosmos , University of Barcelona, Spain. at Dept. of Physics and Physical Oceanography M.Sc. Seminar , Memorial University, Canada. Type: Conference Talk (~15 mins) at Canadian-Cuban-American-Mexican 2022 Conference . Awarded: Feedback award at Canadian Association of Physicists Congress 2022 , McMaster University, Canada. at Atlantic General Relativity Meeting 2022 , Memorial University, Canada. Awarded: B.Sc./M.Sc. Student Talk – 2nd Place.
2021	Title: The many MOTS of the Schwarzschild spacetime Type: Conference Talk (~15 mins) at Canadian Association of Physicists Virtual Congress 2021 , Canada. at Atlantic General Relativity Meeting 2021 (online) , Bishop's University, Canada. at Canadian Student & Postdoc Conference on Gravity , Memorial University, Canada. Awarded: Best M.Sc. Student Talk – 1st Place.

Travel

Spain: Hosted by Dr. Robie A. Hennigar at the Institut de Ciències del Cosmos, University of Barcelona, I was invited to give a seminar talk on the results of [1].

Czech Republic: Hosted by Dr. David Kubiznak at the Institute of Theoretical Physics, Charles University, I was invited to give a seminar talk on the results of [1].

Germany: Hosted by Dr. Daniel Pook-Kolb at the Max Plank Institute for Gravitational Physics, AEI Hannover, I was invited to give a seminar talk on the results of [1].

Languages

Fluent in English, basic knowledge of Cantonese and Thai.
